

# PyLadies

Vienna 19.9.2020

Who?

---

*pyladies*

International mentorship group with a focus on helping more women become active participants and leaders in the Python open-source community.

Our mission is to promote, educate and advance a diverse Python community through outreach, education, conferences, events and social gatherings.

Django Girls is a non-profit organization and a community that empowers and helps women to organize free, one-day programming workshops by providing tools, resources and support.

During each of our events, 30-60 women build their first web application using HTML, CSS, Python and Django.
